

WOOD HANDLING OPTIONS

HOPPERS

Infeed hoppers have the potential to more than double splitting production by reducing wood handling. The hopper is filled with a loader, which means the operator spends less time away from the splitter. This 4m³ hopper feeds timber onto the wood splitter bench for splitting, and is powered by the hydraulics on the wood splitter.

ELEVATORS

Load your split wood directly into your truck or trailer and save double handling. This 3.6m elevator fits Superaxe models WS 3150 & WS 4150. The elevator will reach up to three meters and folds for travelling. It utilises an electric or manual winch mechanism to fold and unfold the elevator. Setup takes only a few minutes.

Below image shows the 3.6m elevator folded and secured for traveling.

FREE STANDING ELEVATORS

Ideal for stockpiling, 6m, 9.5m, 13m & 16m free standing elevators give more height and allow for easy positioning; with the 9.5m & 13m options able to load high sided trucks. There are options to power the elevator by a 6hp power pack or by the hydraulics on the wood splitter. Units are yard towable.

SUPERAXE COMMON FEATURES

THE SUPERAXE WOOD SPLITTER IS AVAILABLE IN 3 DIFFERENT MODELS – THE WS 150, WS 3150 AND THE WS 4150. ALL MODELS FEATURE THE FOLLOWING:

- ▶ **SLIDING BLADE:** Patented vertical action sliding blade with innovative wedge design easily splits the toughest Australian hardwood. Handles different lengths of wood up to 450mm.
- ▶ **INNOVATIVE DESIGN:** Block lifter, large bench area, compact, portable & towable.
- ▶ **BUILT TO LAST:** Rugged heavy-duty construction with minimal maintenance required.
- ▶ **ERGONOMIC:** Back saving log lifter and ideal bench height for advanced operator comfort.
- ▶ **EASY & SAFE TO USE:** Industry leading double handed control system enhances safety by keeping hands away from moving blade.
- ▶ **LONG WARRANTY:** Two-year warranty on all parts and construction. All engines are covered by extensive manufacturers warranty.
- ▶ **BACK GUARDING:** Robust back guarding keeps your worksite safe.
- ▶ **PROUDLY MADE IN AUSTRALIA:** Designed and built in our Victorian workshop with quality components.

THE WS 150 ▶

The midsize Superaxe WS 150 is suited to domestic, farm, hire and semi commercial operations.

The WS 150 features robust construction, a large work bench and a 150kg capacity, cable operated log lifter. The innovative double handed control system ensures ease of use, quick cycle times & unmatched safety. A 9hp power pack is fitted as standard, but a 6hp power pack is also available. The 9hp power pack delivers a whopping 21 tons of splitting power and a 7 seconds cycle time.

The vertical blade & ergonomic design means you work with a straight back

◀ THE WS 3150

The robust WS 3150 Superaxe is suitable for processing larger volumes of firewood for farm, hire or commercial operations.

Featuring a 200kg capacity hydraulic log lifter, larger wheels, a large workbench and a larger frame – the WS 3150 is the second most powerful splitter in the Superaxe range. The innovative double handed control system with auto return creates ease of use, quick cycle times and unmatched safety. The WS 3150 is fitted with a 9hp power pack delivering a whopping 21 tons of splitting power and a 6.5 seconds cycle time. The WS 3150 is also available with a 13hp power pack. This model has all the attachments required to fit/retrofit an elevator. Call us to discuss the options.

THE WS 4150 ▼

The WS 4150 is fast, powerful & highly productive, making it the ideal solution for splitting large volumes of firewood.

Add an infeed hopper and/or outfeed elevator to eliminate extra handling and achieve maximum production. See details on the **WOOD HANDLING OPTIONS** page.

Producing 26 tons of splitting force, the WS 4150 is the most powerful Superaxe in the range with extra features built in to ensure large volumes of firewood can be split with ease. These features include fast cycle times, 200kg capacity hydraulic block lifter, larger bench area, offset splitting head, longer blade, in bench rollers for easy block manoeuvring and the innovative double handed control system for safe and easy machine operation. A 360mm straight blade is fitted as standard, with optional Tee or Cross shaped blades for three or four way splitting.

Our machines can split all species of Hardwood with ease.
